# RANA AHMED HASSAN YOUSSEF ELMALLAH

**JUNIOR DATA ANALYST | POWER BI | SQL | BUSINESS INTELLIGENCE**

**Fujairah, UAE | +971 56 900 6110 | ranaelmalah25@gmail.com**

## JOB OBJECTIVE

Computer Science graduate seeking an entry-level opportunity in Data Analytics, Business Intelligence, or Reporting where I can apply my skills in SQL, Power BI, Excel, Power Query, DAX, and Python to transform data into meaningful insights. Eager to support data-driven decision-making through data cleaning, analysis, visualization, KPI reporting, and interactive dashboard development while continuing to grow professionally in a data-focused environment.

## PROFESSIONAL SUMMARY

Computer Science graduate specializing in Data Analytics and Business Intelligence, with practical training and project experience in Power BI, SQL, Excel, Power Query, DAX, and Python. Experienced in data cleaning, transformation, dimensional data modeling, KPI development, dashboard design, and business reporting through academic and training projects. Developed analytical solutions for job-market and sales data, translating complex datasets into interactive dashboards and actionable insights. Strong analytical thinking, problem-solving, communication, teamwork, and continuous-learning skills.

## EDUCATION

**Bachelor of Computers & Informatics — Major in Computer Science** | Tanta University, Egypt
Graduated: 2026 | GPA: 3.30 / 4.00 | Percentage: 85.92% | Overall Grade: B+
**Graduation Project:** SmartMentor — Graduation Project 1: A | Graduation Project 2: A+

## TECHNICAL SKILLS

**Data Analytics & Business Intelligence:** Power BI • DAX • Power Query • SQL • Excel • Data Cleaning & Transformation • Data Visualization • KPI & Dashboard Development

**Data Modeling & Databases:** Dimensional Data Modeling • Star Schema • SQL Server • Database Fundamentals • SQL Views • Data Preparation & Reporting

**Programming:** Python • C/C++ Fundamentals

**AI & Productivity Tools:** AI-powered tools for research • Data Analysis • Content Preparation • Problem Solving • Workflow Optimization

**Professional Skills:** Analytical Thinking • Problem Solving • Communication • Presentation • Teamwork • Organization • Adaptability • Continuous Learning

## SELECTED PROJECTS

**SmartMentor — Job Market Analysis & Career Insights** | Graduation Project

- Developed a Power BI-based analytical and decision-support solution to help Computer Science and Engineering students understand the Egyptian technology job market and select suitable career paths.
- Analyzed real market data covering career roles, required skills, salaries, work modes, programming languages, frameworks, databases, cloud platforms, and technologies.
- Cleaned and transformed survey-oriented data using Power Query, including null handling, text standardization, and unpivoting repeated skill columns.
- Built a structured dimensional data model inspired by Star Schema principles and created DAX measures for market demand, average salary, work mode, skills, and dynamic career recommendations.
- Designed interactive dashboards and a SmartMentor recommendation engine that combines role demand, salary, work mode, and top technical skills to support career decisions.

**Sales Analysis Data Warehouse** | Business Intelligence Project | May 2025

- Prepared and optimized sales data in SQL Server using SQL views and pre-aggregated datasets to support efficient reporting and analysis.
- Designed a Star Schema combining sales, customer, product, and territory data; created DAX measures and Power BI dashboards for revenue, cost, profit, margin, and regional/product performance.
- Produced management-ready insights applicable to accounting and finance reporting for monitoring sales results, profitability trends, and business KPIs.

**Arduino-Based 3D Printer Prototype** | First-Year Academic Project

- Developed an Arduino-controlled 3D printer prototype, integrating electronic, mechanical, and software-oriented elements into one coordinated academic system.
- Applied embedded-systems fundamentals through component integration, system setup, control-flow implementation, and hands-on prototyping from an early stage of the Computer Science degree.
- Demonstrated rapid technical learning, teamwork, documentation, and the ability to turn a complex multidisciplinary idea into a practical prototype.

## TRAINING & CERTIFICATIONS

**Microsoft Power BI Engineer - DEPI / MCIT:** Nov 2024 - May 2025
**Advanced Data Analytics - NTI / ITIDA:** 120 hours (90 technical + 30 freelancing), 20 Jul - 14 Aug 2025, Score: 74%
**AI Essentials - ITIDA / TIEC, Creativa Tanta:** Dec 2024

## LANGUAGES

**Arabic:** Native | **English**: Professional working proficiency
